

COATINGS

OXITIVE® 7000 SERIES

APE-FREE WETTING
AGENTS FOR WATER-
BASED COATINGS

OXITENO

Evolution by chemistry

A broad range of surfactants designed to decrease interfacial tension between coatings components hence allowing high pigment and filler load of mill-base during grinding, high compatibility of colorants in tinting systems and improved substrate wetting.

BENEFITS

- Reduces the viscosity of the mill base
- Increases pigment load and improves dispersion process
- Suitable for tinting systems
- Broad HLB range

FEATURES

- APE-free surfactants
- Package: Sample, Drum, Bulk
